**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-41, drawn to vertical plant support and anchor, classified in class 47, subclass 47.
- II. Claims 42 and 43, drawn to a horizontal plant support for attachment to a vertical plant support, classified in class 47, subclass 46.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a platform for holding fruit and vegetables off the ground such as tomatoes or structural support for a cover or shade curtain. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

**Upon election of Group 1 above**, applicant is further required to make the following species election:

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A: Figs. 3 and 6, a single vertical support rod (claims 3, 10, 13-15).

Art Unit: 3643

Species B: Fig. 1, two parallel vertical support rods and lateral rod (claims 4-7 and 16).

Species C: Figs. 7-11, horizontal loops engaging elongated rods with protrusions in at least one of the loops (claims , 21-28 and 30-35).

Species D: Fig. 5, one non-linear elongated rod (claims 8 and 41).

**Upon election of Species C above**, applicant is required to make the further election:

Species C1: Figs. 7-9, two horizontal loops, the outer loop having a protrusion in a V-shape (claims 21-28, 30).

Species C2: Figs. 10-11, a single horizontal loop with protrusions as re-entrant clamps (claims 21, 22, 28, 30-35).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 2, 9, 11, 12, 17-20, 29, 36-40 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
